

Manav Mineshkumar Patel

Contact: (+91) 9624819235, E-mail: manavpatel.academic@gmail.com

OBJECTIVE

A final-year Computer Engineering student with hands-on research and projects in AI/ML, Data Science, and scalable systems, with publications in deep learning and computer vision, seeking admission to graduate studies in Artificial Intelligence and Intelligent Systems.

EDUCATION

Charotar University of Science and Technology Sep 2022 – April 2026
Bachelor of Technology in Computer Engineering
CGPA: 9.24

Gujarat Secondary and Higher Secondary Education Board Jun 2021 – Mar 2022
Higher Secondary Education – 12th Standard
Percentage: 75.69

Gujarat Secondary and Higher Secondary Education Board Jun 2019 – Mar 2020
Secondary Education – 10th Standard
Percentage: 87

INTERNSHIPS

Appify Infotech - Full Stack Development Intern | Surat Dec 2025 – Present

- Developed full-stack web applications using the MERN stack.
- Built an Internship Management System with secure authentication and certificate management.
- Developed an Invoice Management System with invoice generation and PDF download features.
- Implemented backend APIs, database integration, and fixed bugs to improve performance.

Appify Infotech - Full Stack Development Intern | Surat May 2025 – Jun 2025

- Ensured that there is a secure gateway for e-commerce web application.
- Created secure user friendly functionality of a web-based application with the assistance of senior developers.
- Location based built-in features to improve user experience and track service in real-time.
- Uncovered and rectified bugs on applications deployed to enhance stability and user satisfaction.

Sparks To Ideas – React Js Intern | Ahmedabad May 2024 – Jun 2024

- Designed and developed an event management website using Reactjs.
- Implemented responsive design principles to ensure optimal user experience across devices, improving accessibility and engagement.
- Gained hands-on experience in web development, focusing on dynamic content rendering, API integration, and front-end performance optimization.

PROJECT WORK DETAILS

LawMate – AI-Powered Legal Assistance Platform Jul 2025 – Nov 2025

Description of the project:

LawMate is an online application that utilizes AI and NLP to reduce complexity and allow users to upload documents for automatic summarization and connect with relevant lawyers. Supports appointment booking and secure online payments through a user-friendly interface.

- **Programming Languages:** Python, JavaScript
- **Technologies:** FastAPI, React.js, Hugging Face Transformers, MongoDB, Tailwind CSS
- **Development Tools:** Visual Studio Code, Git/Github, Postman, Vercel (for deployment)

Description of the project:

AI Trip Planner is a web-based intelligent travel planning platform that generates day-by-day itineraries using a tool-augmented LLM agent. It integrates real-time weather, place search, expense calculation, and currency conversion APIs to provide structured travel plans with cost breakdowns. The system is built with a FastAPI backend and Streamlit frontend following a modular architecture.

- **Programming Languages & Technologies:** Python, LangChain, LangGraph, FastAPI, Streamlit
- **APIs:** Groq / OpenAI, OpenWeatherMap API, Google Places API, Tavily, ExchangeRate API
- **Development Tools:** Visual Studio Code, Git/Github, Postman, Uvicorn

PUBLICATIONS

Hybrid Multi-Layered AI Surveillance System for Weapon & Behavioral Threat Detection

Published in: SmartCom 2026 (Springer Nature)

- Developed a multi-layer surveillance framework combining weapon detection and behavioral anomaly analysis.
- Integrated real-time object detection, emotion recognition, and anomaly detection modules.
- Designed a threat prioritization engine to minimize false positives in crowded environments.
- Achieved F1-score 0.85 with high-speed inference for practical security and public safety monitoring.

Advancing Wildlife Detection with YOLOv8 & YOLOv9

Published in: SmartCom 2026 (Springer Nature)

- Conducted research on real-time wildlife detection using deep learning object detection models.
- Built and balanced an 80-class custom dataset with augmentation for diverse environmental conditions.
- Trained and compared YOLOv8/YOLOv9 models to improve precision and small-object detection.
- Achieved high mAP and reliable performance for deployment in monitoring and conservation systems.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Introduction to LLMs by National Programme on Technology Enhanced Learning (NPTEL).
- AI Agents and Agentic AI with Python & Generative AI by Vanderbilt University (Coursera).
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate.
- IBM RAG and Agentic AI (Coursera).
- Google Cybersecurity Professional Certificate (Coursera).
- AWS Academy Graduate – Cloud Developing.
- Software Testing by National Programme on Technology Enhanced Learning (NPTEL).

CO-CURRICULARS

- Successfully completed the in-house Tata STRIVE Cybersecurity Program.
- Attended the ML Connect: AWS event – a technical session covering innovations in GenAI using AWS.
- Attended the Blockchain Voyager – Bharat Blockchain Yatra event.
- Selected as a finalist in Odoo Hackathon 2025, Ahmedabad.
- Participated in the Bappa Ka Prashad 3.0 global coding challenge organized by GDSC.

SKILLS

- **Programming Languages:** Python, C, C++, Java, JavaScript, C#
- **Frameworks/Libraries:** React.js, Node.js, Express.js, FastAPI, HuggingFace Transformers
- **Databases:** MongoDB, SQL
- **Web & Backend:** REST APIs, JWT Auth, System Design, Real-Time Applications
- **Tools/Cloud:** Git, GitHub, Google Colab, VS Code, Postman, AWS, Razorpay, Deployment & Debugging
